

Lady Margaret Hall Academic Programmes 2018

Academic Content

Short-course delivered over the course of two weeks with 7 full day academic sessions, plus a one-day conference for participants to give short presentations on how the ideas covered in the modules may be applied in contexts that particularly interest them. LMH is responsible for all content and assessment for the Humanities Programme and is working in partnership with the Oxford International Study Abroad Programme on the content and assessment of the Science and Technology Programme.

Assessment

Students will be assessed on their preparedness for seminars, and their engagement with reflection and debate in smaller groups. Assessment will also take place through the power-point presentation at the end of the course.
